

Development Plan Software Engineering

Team 13, Keystone

Ayush Patel
Ahmed Rashrash
Andrew Habib
Waqar Ul-Hassan

Table 1: Revision History

Date	Developer(s)	Change
September 25th 2026 Date2	Ayush Patel Name(s)	Added intro and Sections 1 - 3 Description of changes
...	...	...

This document contains details about the development plan for the project. It includes information about the confidentiality and licensing (sections 1 - 3), team communication and meeting plans (sections 4 - 6), workflow and project decomposition (sections 7 - 8), proof of concept demonstration plan (section 9), expected technology (section 10), coding standard (section 11), and appendices for generative AI use disclosure, reflection, and team charter.

1 Confidential Information?

There is no confidential information to protect in this project.

2 IP to Protect

The intellectual property produced by this project consists solely of written content, namely the code and documentation, which is covered under our copyright license, discussed below.

3 Copyright License

The copyright license adopted by the team for this project is the MIT license. This license provides others the right to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the software, provided that the copyright notice and permission notice are included in all copies. The license also disclaims warranty and limits the authors' liability for any damages arising from use of the software. The [copyright license](#) for the project can be found in the team repository.

4 Team Meeting Plan

5 Team Communication Plan

6 Team Member Roles

7 Workflow Plan

- How will you be using git, including branches, pull request, etc.?
- How will you be managing issues, including template issues, issue classification, etc.?
- Use of CI/CD

8 Project Decomposition and Scheduling

- How will you be using GitHub projects?
- Include a link to your GitHub project

9 Proof of Concept Demonstration Plan

What is the main risk, or risks, for the success of your project? What will you demonstrate during your proof of concept demonstration to convince yourself that you will be able to overcome this risk?

10 Expected Technology

Topics to discuss include the following:

- Specific programming language
- Specific libraries
- Pre-trained models
- Specific linter tool (if appropriate)
- Specific unit testing framework
- Investigation of code coverage measuring tools
- Specific plans for Continuous Integration (CI), or an explanation that CI is not being done
- Specific performance measuring tools (like Valgrind), if appropriate
- Tools you will likely be using?

11 Use of AI and LLMs

12 Coding Standard

13 Appendix — Generative AI Use Disclosure

13.1 AI Tools Used

13.2 How and Where Used

13.3 Verification of AI-Generated Content

Appendix — Reflection

The purpose of reflection questions is to give you a chance to assess your own learning and that of your group as a whole, and to find ways to improve in the future. Reflection is an important part of the learning process. Reflection is also an essential component of a successful software development process.

Reflections are most interesting and useful when they're honest, even if the stories they tell are imperfect. You will be marked based on your depth of thought and analysis, and not based on the content of the reflections themselves. Thus, for full marks we encourage you to answer openly and honestly and to avoid simply writing "what you think the evaluator wants to hear."

Please answer the following questions. Some questions can be answered on the team level, but where appropriate, each team member should write their own response:

1. Why is it important to create a development plan prior to starting the project?
2. In your opinion, what are the advantages and disadvantages of using CI/CD?
3. What disagreements did your group have in this deliverable, if any, and how did you resolve them?

Appendix — Team Charter

External Goals

Attendance

Expectations

Acceptable Excuse

In Case of Emergency

Accountability and Teamwork
